## Mad Science presents: Bugs, Birds & Beasts and Robotics

*Some of the classes we  
will conduct this Semester  
are as follows:*

### Bugs, Birds & Beasts for Grades K-5

Explore the natural world and it's adaptations. Observe creepy crawlies, make casts of animal tracks & study the feeding habits of owls as we dissect their lunch's remains. Some of the weekly topics in this session are: *Bugs, Earthworks, Walloping Weather, Mission Nutrition, All about Animals, Life in the Sea, The Birds & the Beasts, Earth Awareness, Nature and The Science of Sport!*

### Robotics (for Grades 3 and up only)

Spend the semester learning about robots while we experiment and play with them. We will discuss what makes robots different from humans while exploring circuits and conductivity as well as simple machines. Over the course of this semester, you will build the 3-in-1 All Terrain Robot. It is a multi-function tracked mobile robotic kit. Utilize different track modules and make your robot transform into 3 amazing variations: the forklift, rover, and gripper. Using the wired controller, command the robot to move forward, backward, turn, grip and lift.

*A minimum number of students must be enrolled in order for each class to run. Final decisions to run or cancel will be made one week before the start date of the program. There are no refunds for programs children fail to attend.*
