

Dear DWCA Families,

In regard to assignments and lessons for technology class for the coming few days, students will be able to find all the work on my website listed below.

url: <https://techtechnology43.wixsite.com/class>

password: hello

Students are to click on their grade found at the top of the website and then click on the highest number, which would be the most current lesson. All lessons have instruction and links to activities found on my website needed in order to complete the assignments. Students are only expected to log onto the website once a week to complete the assignments. Students do not need to email copies of their work as proof, I will know which students have logged on based of the analytical data taken from my website.

Technology is a class in which the students learn 3D modeling, coding, and typing. Hopefully this will serve as a fun platform for students to interact with during this time. If students or parents have any questions, I can be reached via email at mkurzyna@dwcaonline.org. I will have open office hours via email from 9-11am Monday through Friday as well. Thank you for your cooperation!

Best Regards,
Mrs. Kurzyna
