

10/30/20

Dear Pre-K Families,

As part of an exploration of our sense of hearing, we are learning that we can make music with almost anything! This week, we would like the children to create their own musical instrument at home! You can use objects found around your home, including Tupperware containers, bowls, jars, and/or recycled materials. Recycled materials include, but are not limited to, cardboard egg cartons, cardboard paper towel tubes, small pieces of cardboard, cereal boxes, small boxes, and clean drink containers. What kind of instrument can you make? Be creative!

In-person friends: Please bring your instrument to school on Friday, November 6th to share with your friends. We will have a musical instrument parade and then return the instruments to be kept at home.

Remote friends: Please have your instrument available for our Small Group Meeting on Thursday, November 5th. We will share them with our friends and have a musical parade!

We cannot wait to see what the children create as their instruments!

Thank you for your continued support!
Mrs. Blanco, Mrs. Buscemi, Ms. DeNardo
