

Pre-K Newsletter

Week of

March 21st – 25th

Special Announcements:

Please note Pre-K will be closed on April 6th for faculty professional development

School is closed for spring break from April 14th – 22nd. Classes resume on April 25th

Reminders:

- Family Engagements help enhance your child's understanding of our current unit of study. Please consider completing an activity each week.
- Please do continue to help your child practice writing their first and last name with initial capital and the rest of the letters lower case letters.
- Please remember to send in an absence note on your return.

This week we wrapped up our Water unit with the read aloud *The Pigeon Needs a Bath* by Mo Willems and learned how important water is for all living things including animals and plants.

The children were encouraged to use their senses to observe any type of water that they see during the day. We discovered that we have a lot of water around us, whether it came from our sink, in our food at meal times, and even on our windows in the form of condensation!

In the Science Center, the children observed how colored water travels up the stems of celery to show how plants drink water up their stem.

Following on from our discovery that salt mixed (dissolved) into water, we also tried mixing water with rice, sugar, and oil. We observed that only the sugar dissolved.

We also discussed the changes in Spring as our class bears came out of hibernation.

Next week we will begin our next unit on Plants.

Events and Birthdays:

March 30th – Valentina's 5th birthday!
April 6th – Pre-K closed for faculty PD
April 14th – 22nd - Pre-K closed –
Spring Break
April 25th – Classes resume
