

April 29th 2022

Dear Pre-K Families,

As we continue our exploration of plants we are excited to hear about how your child is helping the seeds and plants at home grow!

You can continue to support your child's learning by completing one or both of the family engagement activities below.

- * Go on a plant scavenger hunt together. You can look for things such as a patch of grass, a tree taller than you are, something with petals, or other plant parts or types that can be found in your neighborhood. Complete the attached chart in GC and discuss the differences you see now it is springtime.

- * This week we looked at how tall our class plants were growing by counting unifix cubes. Continue to observe your plants growing at home and find another way to measure them, e.g. How many Lego bricks tall? Wooden blocks? Or use a piece of yarn?

Thank you for your continued support,

Mrs. Blanco and Mrs. Buscemi
