

What We Learned:

Reading and Writing: HAPPY POETRY MONTH! This week we have been talking about what poetry is. We also wrote beautiful acrostic poems with the word "spring". These poems are proudly displayed on our hallway bulletin board!

Science: This week we introduced the new science unit engineering! We discussed what it means to be a good engineering and how to plan like an engineer. This month will be filled with opportunities for the students to work and create together!

Math: We started chapter 10, we are learning strategies to add two digit numbers!

Religion: This week we began to discuss Holy Week and the events leading up to Jesus' resurrection.

Week of April 4th

Reminders:

- Please practice tying shoes at home.
- Students should be reviewing their prayers and the pledge regularly.

Dear First Grade Families,

I am so excited for this months activities! The students will be able to explore their creative writing through different forms of poetry. They will also be able to construct, build and problem solve during our engineering unit. This will be a great opportunity to teach the students how to work as a team on projects! If you have any questions please reach out!

- Miss Fitzgerald
